C-STEM DAY
MAY 21st, 2016

On C-STEM

C-STEM (Computing, Science, Technology, Engineering, and Mathematics) is a UC Approved Educational Preparation Program for Undergraduate Admission to all UC campuses. Therefore, participation in the C-STEM program, C-STEM student individual and team awards, and extracurricular activities are recognized in the UC admissions process as achievements that have explicitly prepared students for college and career. New undergraduate applicants in on-line application can select C-STEM as a UC Approved Educational Preparation Program.

About C-STEM DAY

The C-STEM Day is organized to build public awareness and advocate for Integrated Computing and STEM education. The C-STEM Center and our partners organize curriculum-based RoboPlay Competitions and Math Programming Competitions in various regions on the annual C-STEM Day in May to further engage students in project-based team activities and to showcase their accomplishments and creativity in not only math and engineering, but also in writing, art, music and film production. Various C-STEM awards and scholarships are presented at the awards ceremonies to outstanding students to recognize their achievement and inspire them to pursue computing and STEM related careers and post-secondary study.
